High Performance and High Sensitivity GPS Smart Personal Tracker

General Description

SPT10 is a small and reliable GPS/GSM/GPRS tracking device which is developed and designed in security and real-time tracking use, for child, the elder, pet, asset, and vehicle.

With the superior sensitivity GPS chipset on board, SPT10 can easily get fixed even in urban canyons. In addition, with one panic button for emergency, the pocket size and its light weight, long standby time and smart power management function, SPT10 has all you need.

No matter you want to keep in touch with your beloved, protect your children, monitor your staff or simply require real-time GPS location during the journey, SPT10 is your Stella.
